## Projects

### HearHear

[Live](#) | [Git](#)

Music sharing platform built with Ruby on Rails and Backbone.js

- Allows discovery of new music with simultaneous listening, using a custom audio player built with jQuery, Web Audio API, Javascript, and HTML5.
- Implemented pagination with Kaminari plugin to reduce load time of music library
- Dynamic search results based on user applied filters using custom Rails Routes and Backbone Views

### Snake

[Live](#) | [Git](#)

Browser version of a classic arcade game

- Built with HTML5 and Javascript
- Uses jQuery and CSS3 to create an 8-bit look

### Chess

[Git](#)

Command line version of Chess built with Ruby

- Multi-level class hierarchy to keep code DRY
  - Chess AI that determines all possible moves for each piece, prevents checkmate.
- 

## Skills

Ruby, Ruby on Rails, Backbone.js, jQuery, Javascript, SQL, HTML5, CSS3, TDD, Git

---

## Experience

### Trust Company of the West

**2012 - 2015**

Mutual Fund Administrator

Los Angeles, CA

- Managed development and implementation of automated processes that improved efficiency by up to 50% for the Fund Administration Team
  - Worked closely with development team to ensure propriety software was developed properly resulting in less production issues.
  - Lead discussions with team members and senior officers to determine inefficient areas and develop methods to improve.
- 

## Education

### App Academy

**Summer 2015**

Full Stack Web Development Course with acceptance rates < 5%

- Focus on web development and agile methodologies
- Strong emphasis on code quality and design patterns

### University of California, Los Angeles

**June 2009**

B.A. Economics

- Specialization in Computing (C++, Java)
-
