Projects

HearHear

[Live](#) | [Git](#)

Music sharing platform built with Ruby on Rails and Backbone.js

- Allows continuous playback while browsing, using a custom audio player built with jQuery, Web Audio API, Javascript, and HTML5.
- Implemented pagination with Kaminari plugin to reduce load time of music library
- Dynamic search results based on user applied filters using custom Rails Routes and Backbone Views

Snake

[Live](#) | [Git](#)

Browser version of a classic arcade game

- Built with HTML5 and Javascript
- Uses jQuery and CSS3 to create an 8-bit look

Chess

[Git](#)

Command line version of Chess built with Ruby

- Multi-level class hierarchy to keep code DRY
 - Chess AI that determines all possible moves for each piece, prevents checkmate.
-

Skills

Ruby, Ruby on Rails, Backbone.js, jQuery, Javascript, Git, SQL, HTML5, CSS3, TDD

Experience

Trust Company of the West

2012 - 2015

Mutual Fund Administrator

Los Angeles, CA

- Worked closely with development team to ensure propriety software was developed to spec resulting in less production issues.
 - Designed and implemented new features to automate Fund Administration processes that improved efficiency by up to 50%.
 - Led discussions with team members and senior officers to determine bottlenecks and develop improvements to our process.
-

Education

App Academy
